EXPERIENCE

GE // Software Engineering Intern

June 2017 - August 2017

GE Digital — New Orleans

Will develop internal GE software with junior software developers and other interns. Agile work. Unit testing. Git & Github. Software development: Java, C, Fullstack: HTML, CSS, JS, Angular, React.

Undergraduate Researcher

Fall 2016 - Spring 2017

Researched using machine learning under Dr. Ashwin Ashok at Georgia State University.

PantherHackers

November 2016 - April 2017

Chair of Internal Affairs

Organization promoting computer science skills and providing opportunities for GSU students. Worked with sponsors and university staff to organize workshops and hackathons. Increased member base from 90 to 500 in one year. Managed the organization's structure.

PROJECTS

Bike Signal

Fall 2016 - Now

Android app that utilizes a cellphone's sensors, a Raspberry Pi, and LED strips to determine when bikers are turning and automatically signal drivers.

BTCheckIn

hackGSU Fall 2016

Made use of Arduino and Bluetooth to automatically log-in employees based on their cellphone's unique Bluetooth ID number. Designed interface using HTML5, SCSS, Mustache, and Javascript. Project also used MySQL, PHP, and Apache
